

Advantage Software Wants You to Have This!

Why else would they provide to you, *at no charge for a full year*, the incredible SearchMaster 11 software that you received either with your Total Eclipse CD or with the computer you recently ordered from ASI (on which SearchMaster was preinstalled)? With SearchMaster, you can find, in seconds, using *multiple wildcards*, the spellings of . . .

Attorneys and their city and state locations! (**Over 1.8 million!**)
Doctors and dentists and their city, state, and specialty! (**Over 1.9 million.**)
Street names in the U.S., Guam, and Puerto Rico! (**Over 6.5 million!**)
Medical terminology! (Case-sensitive, of course.) Over **275,000 references.**
Drug names (case-sensitive) Over **30,000** references!
Cities of the US and the world! (over **450,000** references.)
Hospitals and clinics in the U.S.!
Elementary, junior, and high **schools** in U.S. and Canada!
Colleges & Universities of the world!
Asbestos terminology!
Aviation terminology!
Biology terminology!
Boating and Oceanography terminology!
Car and truck terminology!
Chemical terminology!
Computer and technology terminology!
Construction terminology!
Countries of the world!
Environmental terminology!
Financial terminology!
Latin and legal terminology!
Military bases and military terminology!

Tired of clicking through Google pages until your fingers bleed? Tired of not being able to use *wildcards* for your searches? Install and register the SearchMaster 11 that Advantage Software has provided to you, and those days will be over!

And there's **more!** If you save, in SearchMaster's ASCII folder, an ASCII copy of each transcript you produce, you can create a multiple-wildcard-searchable database of those transcripts so that you can -- are you ready for this? -- **search them all at the same time** for words and/or names that came up in your previous transcripts! You can even create a master index of all your ASCII transcripts, one that will contain (and allow you to find *in two seconds flat*) the spelling and

location of any *word*, any *name*, and/or any *proper noun* in all of those transcripts!

SearchMaster 11, a \$289 value, is yours at no charge for a full year; and when that year is over, the next year will cost the paltry sum of \$59.

Turn on your speakers, then click [HERE](#) to see SearchMaster do its magic!
